About:

I am P. Syamala, currently pursuing my B.Tech in computer science and engineering with this CGPA of 8.3. I am skilled in C programming, Python. Passionate about project development, my primary focus revolves around elevating the front-end user experience. I am enthusiastic about contributing my skills to the creation of projects that prioritize not only functionality but also intuitive and visually appealing user interfaces

Project and internships:

I have completed my internship on advanced data science. I have enhanced proficiency in languages like Python and numpy.

Objective:-

 I am intrested in Python project with the aim of honing programming skills and deepening of software development principles. This project seeks to leverage Python's versatility understanding to create a robust and scalable solution. The primary objectives include mastering key Python libraries, implementing best coding practices, and ultimately delivering a functional and well-documented project.
